

Your privacy and security

Knights & Bytes respects the privacy and confidentiality of website users.

This statement relates to the privacy and security of your personal information and the security of your other information.

The Knights & Bytes website - www.knightsandbytes.com.au

- retains the **email address** of people who send emails through the 'Contact us' form, for the purpose of sending a response. They are stored in a secure area within the Knights & Bytes database system and will not be used for any other purpose, nor disclosed without your consent.

A major function of the website is to provide a **portal to a FileMaker Server** which hosts databases such as the Secchi database for the NRM Board which is used by people around the State to record turbidity levels along the coast. Other databases permit schools to register athletes in SAPSASA Athletic Carnivals or for chess events run by the SA Junior Chess League.

Access to all these databases is via logins and encrypted passwords. There are also levels of security within the databases so access to many items of data or screens is often restricted. The Server is located in a secure site and similarly the association backups are also secure and off-site.

The data collected via the databases is only shared by the administrator of the Server and the client requesting the service. Databases where the user has provided sensitive data such as full names, addresses, DOBs, phones numbers etc are treated with the utmost care. The data is not passed on to any party other than those for whom it is intended. It will not be used for any other purpose, nor disclosed, without your consent.

- You should note that there are inherent risks associated with transmission of information via the Internet. You should make your own assessment of the potential risks to the security of your information when making a decision as to whether or not you should utilise this site. There are alternative ways to obtaining information from, and transacting business with Knights & Bytes for those users who do not wish to use the Internet.
- Please note that www.knightsandbytes.com.au contains links to a number of other websites that are included on the basis of containing content useful to typical users of the site. When a user has clicked on a link to another website, they leave this site and this privacy and security statement does not apply to those websites.

The content of this privacy and security statement may be updated from time to time, so we suggest that if you return to this site on a regular basis that you carefully read the information provided.
